

I hope the FCC will not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Our state's new Telephone Privacy law has greatly improved our family's time at home. From as many as 6 or 8 calls per week, usually right at dinner time, we are now receiving almost none. I have always refused to do anything over the phone anyway because of all the scams that are out there. So phone calls are a total waste by any organization. I really believe it is my right to refuse such calls. Thank you.
